SHAMBHU KUMAR QSpiders | JSpiders | PySpiders, NOIDA

Q1

Write a java program to take a user input and print each digits of the number one by one from right to left.

Input:

N=43705;

Output:

5
0
7
3
4

While Loop Digit based Programming

Q2

Write a java program to take a user input and print each even digits of the number one by one.

Input:

N=43705;

Output:

0

4

While Loop Digit based Programming

Q3

Write a java program to take a user input and print each odd digits of the number one by one.

Input:

N=43705;

Output:

5

7

3

While Loop Digit based Programming

Q4

Write a java program to take a user input and print each digits of the number which are greater than or equals to 5 one by one.

Input:

N=43705;

Output:

5

7

While Loop Digit based Programming

Q5

Write a java program to take a user input and print the biggest digit of the number.

Input:

N=43705;

Output:

7

Important
Don't leave it..!!

While Loop Digit based Programming

Q6

Write a java program to take a user input and print the difference of biggest digit and smallest digit of the number.

Input:

N=42375;

Output:

5

While Loop Digit based Programming

Q7

Write a java program to take a user input and count the total digit of the number.

Input:

N=43705;

Output:

5

Important
Don't leave it..!!

While Loop Digit based Programming

Q8

Write a java program to take a user input and count how many 0 digit is in number.

Input:

N=430705;

Output:

2

While Loop Digit based Programming

Q9

Write a java program to take a user input and count how many 3 has appeared in the number

Input:

N=4373533;

Output:

4

While Loop Digit based Programming

Q10

Write a java program to take a user input and count the even digits of the number.

Input:

N=42765;

Output:

3

While Loop Digit based Programming

Q11

Write a java program to take a user input and count the odd digits of the number.

Input:

N=42765;

Output:

2

While Loop Digit based Programming

Q12

Write a java program to take a user input and count all the digits of the number which are less than or equals to 5.

Input:

N=42765;

Output:

3

While Loop Digit based Programming

Q13

Write a java program to take a user input and print the sum of each digit of the number.

Input:

N=4207065;

Output:

24

Important
Don't leave it..!!

While Loop Digit based Programming

Q14

Write a java program to take a user input and print the sum of each even digits of the number.

Input:

N=42765;

Output:

12

While Loop Digit based Programming

Q15

Write a java program to take a user input and print the sum of each odd digits of the number.

Input:

N=42763;

Output:

10

While Loop Digit based Programming

Q16

Write a java program to take a user input and print the sum of each digits of the number which are less than or equals to 5.

Input:

N=42765;

Output:

11

While Loop Digit based Programming

Q17

Subtract the Product and Sum of Digits of an Integer

While Loop Digit based Programming

Q18

Add Digits

While Loop Digit based Programming

Q19

Count the Digits That Divide a Number

While Loop Digit based Programming

Q20

Write a java program to take a user input and reverse the number.

Input:

N=3745;

Output:

5473

Important
Don't leave it..!!

While Loop Digit based Programming

Q21

Mirror Distance of an Integer

While Loop Digit based Programming

Q22

Write a java program to take a user input and print each digit of the number from left to right.

Input:

N=43705;

Output:

4

3

7

0

5

While Loop Digit based Programming

Q23

Palindrome Number

**Important
Don't leave it...!!**

While Loop Digit based Programming

Q24

Write a java program to take a String input and check whether the given String is a palindrome String or not.

Palindrome String: if String is same from both side

Input:

String s1="madam";

Output:

madam is a Palindrome String

**Important
Don't leave it...!!**

While Loop Digit based Programming

Q25

Number of Steps to Reduce a Number to Zero

While Loop Digit based Programming

Q26

Factorial Trailing Zeroes

While Loop Digit based Programming

Q27

Power of Two

While Loop Digit based Programming

Q28

Power of Three

While Loop Digit based Programming

Q29

Power of Four

While Loop Digit based Programming

Q30

Number of 1 Bits:

While Loop Digit based Programming

Q31

WAP to convert a positive number into binary form.

i/p: 20

o/p: 10100

While Loop Digit based Programming

Q32

WAP to take binary input and print its decimal representation.

i/p: 10100

o/p: 20

While Loop Digit based Programming

Q33

Binary Number with Alternating Bits

While Loop Digit based Programming

Q34

Write a java program to take a user input and return true if any two adjacent numbers are not same.

Input:

N=4207065;

Output:

true

While Loop Digit based Programming

Q35

Write a java program to take a user input and return true if all the digits of the number is in increasing order.

Input:

N=5689;

Output:

true

While Loop Digit based Programming

Q36

Write a java program to take a user input and return true if all the digits of the number is in decreasing order.

Input:

N=7431;

Output:

true
